Lectures on Classical Mechanics - University of California ...

Classical mechanics is a peculiar branch of physics with a long history It used to be considered the sum total of our theoretical knowledge of the physical universe (Laplace's daemon, the Newtonian clockwork), but now it is known as an idealization, a toy model if you will

Lecture Notes in Classical Mechanics (80751)

According to classical physics, "reality" takes place in a product space $R^3 \times R$, where R^3 represents space and R represents time The notions of space and time are axiomatic in classical physics, meaning that they do not deserve a definition (In relativistic physics, the notions of space and time are intermingled, and one
